# JOANNA ROSS

**TECHNICAL OPERATIONS | SOLUTIONS IMPLEMENTATION | AUTOMATION**

Mount Forest, ON | 416-876-1490 | abacus36@outlook.com
Portfolio: phyliaconsulting.ca

## Professional Summary

Technical operations and support professional with 10+ years of experience in telecommunications, complex troubleshooting, solution delivery, and technical training. Combines advanced network support experience at Cogeco with independent work building business applications, AI-assisted workflows, and self-hosted services. Translates operational needs into practical systems, documents repeatable processes, and helps users adopt technology. Hands-on project experience with n8n, PostgreSQL, Docker, Linux, and application integrations.

## Core Capabilities

Technical operations: Incident escalation, systematic troubleshooting, service diagnostics, knowledge-base documentation, and process improvement.

Solutions implementation: Requirements clarification, Wi-Fi design, installation coordination, configuration, customer communication, and technical handover.

Automation and AI: n8n workflows, AI-assisted development, structured AI outputs, application integrations, approval controls, and operational dashboards.

Technical enablement: Technician mentoring, training guides, workshops, and clear explanations for technical and nontechnical users.

## Professional Experience

### Advanced Support Specialist | Cogeco Connexion

Feb 2018 - Nov 2026

- Resolved third-level escalations for business and residential customers across Wi-Fi, networking, cable modems, EPON ONUs, and static IP services.
- Used packet analysis, performance dashboards, and vendor diagnostic tools to isolate complex connectivity and service issues.
- Created predictive Wi-Fi designs with Ekahau and Hamina and translated technical findings into practical recommendations.
- Developed troubleshooting playbooks, knowledge-base content, and customer performance reports to support consistent diagnosis and resolution.
- Collaborated with engineering and other internal teams on complex issues; trained and mentored technicians through guides, workshops, and shadowing.

### Wi-Fi Delivery Specialist | Cogeco Connexion

May 2016 - Feb 2018

- Coordinated installation and provisioning of managed business Wi-Fi services and supported static IP installations.
- Worked with sales and engineering to develop business cases and custom technical solutions for business customers.
- Configured and upgraded network equipment, optimized performance, and provided second-level support during service delivery.

## JOANNA ROSS

## Independent Projects

### Phylia Consulting | Business Systems and AI Workflows

2026 | Independent development using AI-assisted tools

- Built a website and CRM workflow connecting customer inquiries, review queues, project quotes, customer responses, invoicing, and bookkeeping.
- Connected a Cloudflare Worker intake endpoint to a Flask API and PostgreSQL database, with input validation, origin restrictions, and server-side authentication.
- Integrated AI-assisted proposal drafting using customer context, structured JSON outputs, validation, and editable fallback templates.
- Implemented human approval before outbound customer actions, keeping generated drafts separate from approved execution.
- Added inbound email review, recurring-service reminders, scheduled tasks, and deduplicated failure alerts to support routine operations.
- Developed audit logging, private receipt storage, database migrations, and focused workflow checks; documented system components and deployment procedures.

### Home Lab | Self-Hosted Applications and Monitoring

2026 | Personal technical environment

- Configured a Proxmox-based lab with virtualized workloads and Docker services for automation, databases, local AI, and monitoring.
- Built a personal capture and list-management system using PostgreSQL, FastAPI, n8n, and Ollama, with queued processing states.
- Used Prometheus, Grafana, node-exporter, and cAdvisor for host and container metrics; configured Cloudflare Tunnel access for n8n.
- Troubleshot service reachability, network addressing, and application connectivity across a multi-host environment.

## Technical Toolkit

Business systems and projects: n8n, PostgreSQL, Python/Flask/FastAPI project code, REST/JSON integrations, HTML/CSS/JavaScript, Git, and VS Code.

Infrastructure and monitoring: Windows, Linux, Proxmox, Docker, Cloudflare, Ollama, Prometheus, Grafana, and Wireshark.

Enterprise support: ServiceNow, Jira, Confluence, Salesforce, Cisco, Juniper, Aruba, Plume, Ekahau, and Hamina.

## Education and Credentials

JNCIA | Earned May 2024

CCNA | Previously held, 2016 - 2019

Wireless Networking Certificate | George Brown College, 2016

Computer Programmer/Analyst Diploma | George Brown College, 2000

## Earlier Experience

Computer Tutor and Assistant | Toronto Employment and Social Services | 2014 - 2015

Technical Support Agent, Sony Mobile | Teleperformance, Greece | 2012 - 2013
